Orion BMS Scangauge Gauge List						
NOTE: Ewert Energy Systems is not affiliated with Scangauge in any way. Scangauge is copyrighted by it's owners. Please contact the owners of Scangauge directly for support regarding this product. Additionally, this list of PIDs is not intended to be an exhaustive list.						
NOTE: The "ECM Simulation" field may need to be enabled in the battery profile depending on whether or not the vehicle has an Engine Control Module (ECM). Additionally, the communication mode on the Scangauge may need to be forced into CANSF mode (500 kbps). Not all CAN frequencies are supported by Scangauge.						
Scangauge Website:	http://www.scangauge.net					
Gauge	TXD	RXF	RXD	MTH	NAM	
Pack Voltage	07E322F00D	046205F0060D	3010	0001000A0000	VLT	
Pack Amperage	07E322F00C	046285F0060C	3010	000100010000	AMP	
Pack SOC	07E322F00F	046285F0060F	3008	000A00020000	SOC	
Pack CCL	07E322F00A	046205F0060A	3010	000100010000	CCL	
Pack DCL	07E322F00B	046205F0060B	3010	000100010000	DCL	
Low Cell Voltage	07E322F032	046245F00632	3010	000100640000	LCV	
High Cell Voltage	07E322F033	046245F00632	3010	000100640000	HCV	
High Temp	07E322F028	046205F00628	3008	000100010000	HTP	
This list is not exhaustive or complete. More Gauges can be added from the OBD2 PID list also provided on the BMS website.
